Subject: mine waste water on our personal property

Hello, I watched the meeting today and got your e-mail. We are on the animas consolidated ditch, we were not notified of the toxic water heading our way. We now have a pond on our property that is contaminated. If we would have been notified we could have closed the headgate and kept this off our property. Is anyone going to tell us what we are supposed to do? It makes me very uncomfortable knowing that there is lead and arsenic among other things all over our property.
